

ECE 2024 Class Profile

preface

This survey and the information collected (other than the distribution of the questionnaire) was done completely independent of the University of Waterloo and the Department of ECE/Engineering.

All questions with sensitive/identifying info were optional and **no data** will be shared with the school.

We left the data pretty much intact (as you'll see, some troll responses exist). But, we did prune some very obviously incorrect responses that skewed the data (ie, coop salary of \$100,000/hr).

We hope this survey comes across as informational and lighthearted- we apologize for any offence or harm the results or responses might possibly evoke- this survey, as well as the profile, was made with the best intentions possible.

We know this isn't the prettiest class profile- but we hope you can appreciate the results regardless.

Thank you to everyone who filled out the survey- and apologies for the time it took! Amidst grad trips, moving to new countries, starting new jobs, things got busy quick. But alas, here we are!

about the program

Electrical and Computer Engineering (ECE) is a five-year undergraduate engineering program at to the University of Waterloo (UW).

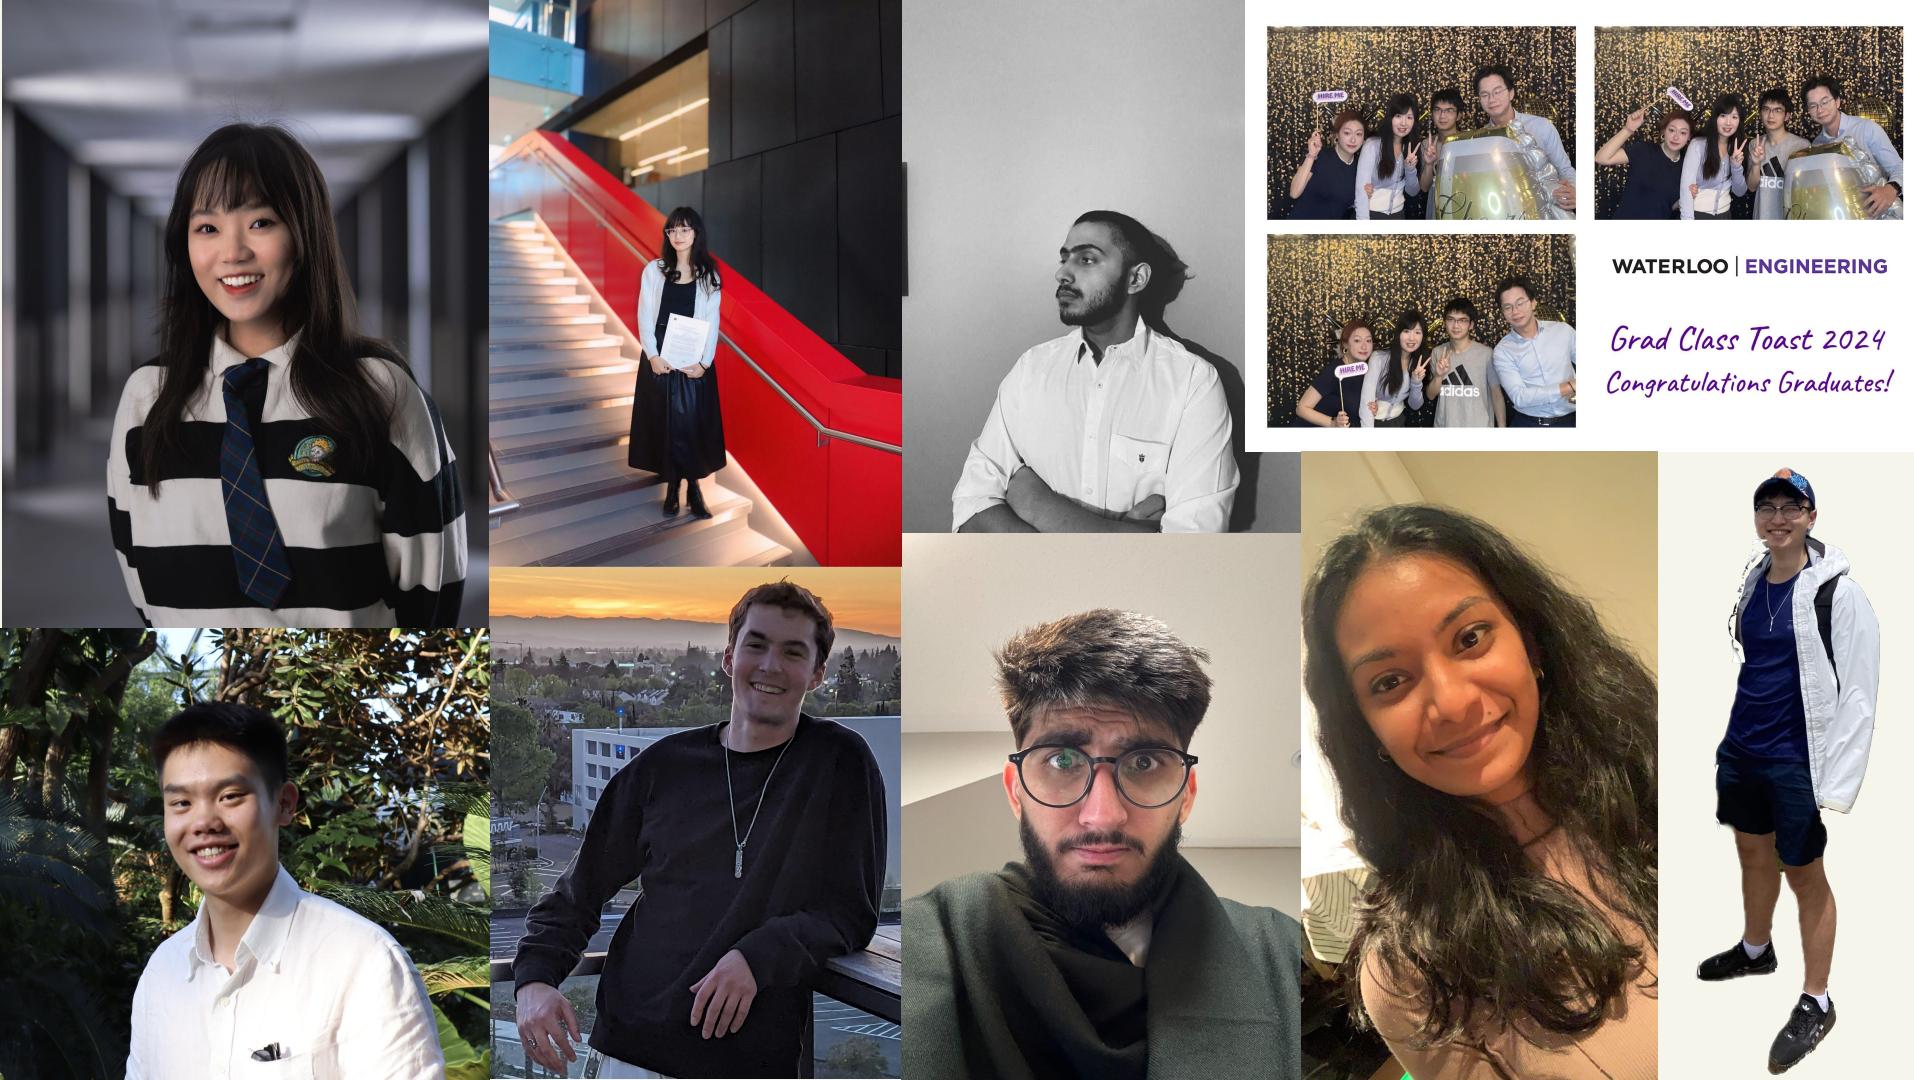

In the initial semesters, individuals in both disciplines complete the same course work, but starting around the second year, the programs fork into their specialties and students begin to shape their degree (at least, somewhat, given the curriculum is mainly set until the final year).

Students spent 8 semesters in school and also typically work 6 co-ops.
Undergraduates are awarded a Bachelor of Applied Science (BASc) degree.

Photographer: Anda Su

Do you plan on getting your P. Eng?

Have you ever considered switching out of ECE?

Have you ever considered dropping out?

Was Waterloo your first choice?

Was ECE your first choice?

Did you feel senioritis (being drained and not wanting to do work/slacking off) near the end of your degree?

Were you burnt out by 4B?

Are you happy with your choice to come to ECE & Waterloo?

Will you be able to pay off your student debt?

Would you ever consider donating to Waterloo?

What do you regret doing during your time here:

Spending too much money on foods and clothes in first and second year.
 Not making closer/more friends and more friends in different programs
 Studying too much and Not making more of undergrad coming here
 Not enough socializing, Not join eNough clubs, Not joining design teams
 Not going out more in 1st year
 Being a bad friend
 Overloading courses for a Statistics option, turns out I liked probability but Not statistics.
 Not trying harder
 Being lazy
 Interacting with Prof Damen O
 Staying up too late
 Stressing about every little thing
 Not taking first year seriously
 Focusing on school more than coop/job search
 Hanging around negative and toxic people
 Leetcode
 Doing a 6th coop instead of taking it off
 Slacking off, Not going to lectures, Not paying as much attention, Not getting eNough sleep
 Staying inside
 Not exploring and trying more things outside my comfort zone
 Not having more fun
 Living off campus first year
 Skipping weeks of classes
 Caring too much about marks

Taking EARTH 121
 Addiction
 Be more social in later years
 Not spending eNough time with friends
 Focus less on school and enjoy my time here with people
 Slacking on some group projects/letting ppl carry me playing games
 Spending too much time worrying about marks
 Cheating on useful courses, Not meeting eNough people
 Taking Flair Air
 Staying inside my inner circle too much
 I took a coop remote instead of in person, and missed out on meeting many people
 Focused too much on academics
 Study too much
 Being content with high school friends and Not making an effort to make new friends
 I was waiting for this question as I am very passionate about this topic!! I regret wasting my time in the soul-crushing grind of ECE at Waterloo when I can achieve the same career success through a more sensible and easy program (i.e., MGMT engineering) that doesn't drain every ounce of my sanity. By pursuing a less demanding program like MGMT Eng, I would have eNough free time to build meaningful relationships with my peers and enjoy my time at university, focus on landing top internships, and actually live life without the constant stress. P.S., I spent more time writing this response than I did on filling out the rest of this survey :)
 Nothing
 Nothing big
 No regrets
 Fumbling the girl that asked me out in first year by being dense af

slacking off too much
 Not HAVING ENOUGH FUN
 Nothing
 No going on exchange
 Eating so much lazeez
 Trying too hard for marks
 Not making many friends
 Spending too much time studying
 5 years too long
 Regret for Not doing leetcode
 spending too much time worrying
 Joining more extracurriculars, clubs and meeting new people
 Staying at home/room too much
 Spending too much time with others and Not eNough by myself
 Not being more social earlier on, picking ece instead of mgmt eng, joining more clubs/intramurals
 Not making better connections with professors
 Not chilling
 Studying on weekend nights
 Quantum physics as an elective
 Spending too much time working
 Staying in an unhappy relationship
 Not switching to CE, Not chilling more
 Not meeting more people, doing more extracurriculars.
 coming here
 Being more involved, making more friends and meeting more people

What do you regret NOT doing during your time here:

- Not grinding more
 Not starting leetcode earlier, grinding harder all around,
 and Not talking to more people
 Start focusing mental and physical health.
 More clubs, meeting more people
 Taking almost No time for myself or to meet new people.
 More extracurriculars
 Design team stuff, just being more involved in engineering clubs and culture
 Socializing more and making more memories
 Meeting more Non ECE people
 Joining clubs, LeetCode
 Talking to more people and trying new things
 switching to ce sports, nightlife
 Moving out
 Paying better attention in class
 Everything
 Taking more elective courses I was interested in, like Graph Theory, Stochastic Processes, Japanese, ASL.
 Not doing SYDE
 Not joining a design team
 Meeting friends!
 Joining design teams and being more involved
 Not being more social
 Venting to people
 Not joining engineering teams
 exchange, travelling during school/remote coop, hackathons, getting to kNow more people
 I regret Not making more friends
 Join actual clubs and meeting more people
- Making more personal connections, engaging in more romantic relationships
 Going out more and making more friends.
 Being more serious about the co-op job search and related preparation
 Hanging with the mandem
 Socializing more
 Getting involved earlier
 I regret Not doing more intramural sports
 Going to more clubs
 Meeting new people, going out
 Grinding academics/co-op and having fun with my friends / going out
 Take ECE320
 Not making more friends early on
 Not joining eNough clubs and making friends
 Doing more intramural sports and clubs
 Asking for more help and talking to professors
 Not socializing more during 1st year
 Not making more friends / relationships, Not doing research
 Failing lol
 Hating on ECE 307, jk, going to social events
 Connecting more w classmates
 didn't spend a lot time and spare No effort on improving coding abilities
 Tasking Difficult but interesting courses
 Cheating on useless courses
 Tryharding for co-ops in 3rd year
 My coop jobs, my grades, my use of time
 Didn't grind side projects and leetcode
 Going to exchange
- Not joining a club or design team, Not doing an exchange term
 Made coop my identity
 Not going on exchange
 I wish I participated in more mentorship events for the younger engineering students. I was an orientation leader in 3B and LOVED it. It was fun answering the younger students' questions and giving them guidance. I also loved talking with other people because it helped me break out of my shell and drastically improved my social skills. I wish I did that for every frosh week during my university career!
 should've been more social outside my circle
 Not connected to the folks eNough, didn't work hard
 many side projects/being Nomad during covid/involve in student clubs
 PLAYING SPORTS
 Exchange, more sex
 Meeting more people
 Making more friends outside of ECE
 Sushi star, I had No idea how good it was till 4B
 I should have gone out more, and done more extracurriculars
 Working hard to get the best coops
 Getting more involved in the community
 Going out more
 having spontaneous fun with friends
 Joining clubs and extracurriculars
 Getting out of my comfort zone earlier
 A lot of things, basically regret being a shut-in
 Switching programs
 Doing the degree
 Joining robotics club
 More extracurriculars and events
 I didnt speak to eNough people in my class
 Living life, Being young
 Seeing more friends

Closing

Thank you to everyone who took the time to fill out this survey, and for being so patient while we aggregated the results. We truly had a special group of people in this class, and there's no one else that we would want to spend 5 years of our lives with to go through all of the trials and tribulations of Waterloo ECE.

Thank you for all the memories, experiences, laughs, tears, and so many more emotions. Regardless of how much you interacted with each individual person in our class, the impact you had on shaping the experience completing this degree was immense.

From the entire class profile team, we wish you the utmost success in any endeavours you are now doing or take on in the future. You conquered ECE 2024- the world is your oyster, and you've proven to yourself that **nothing** is impossible.
